

PROTECT YOUR MOST PRECIOUS

► Protective Eyewear

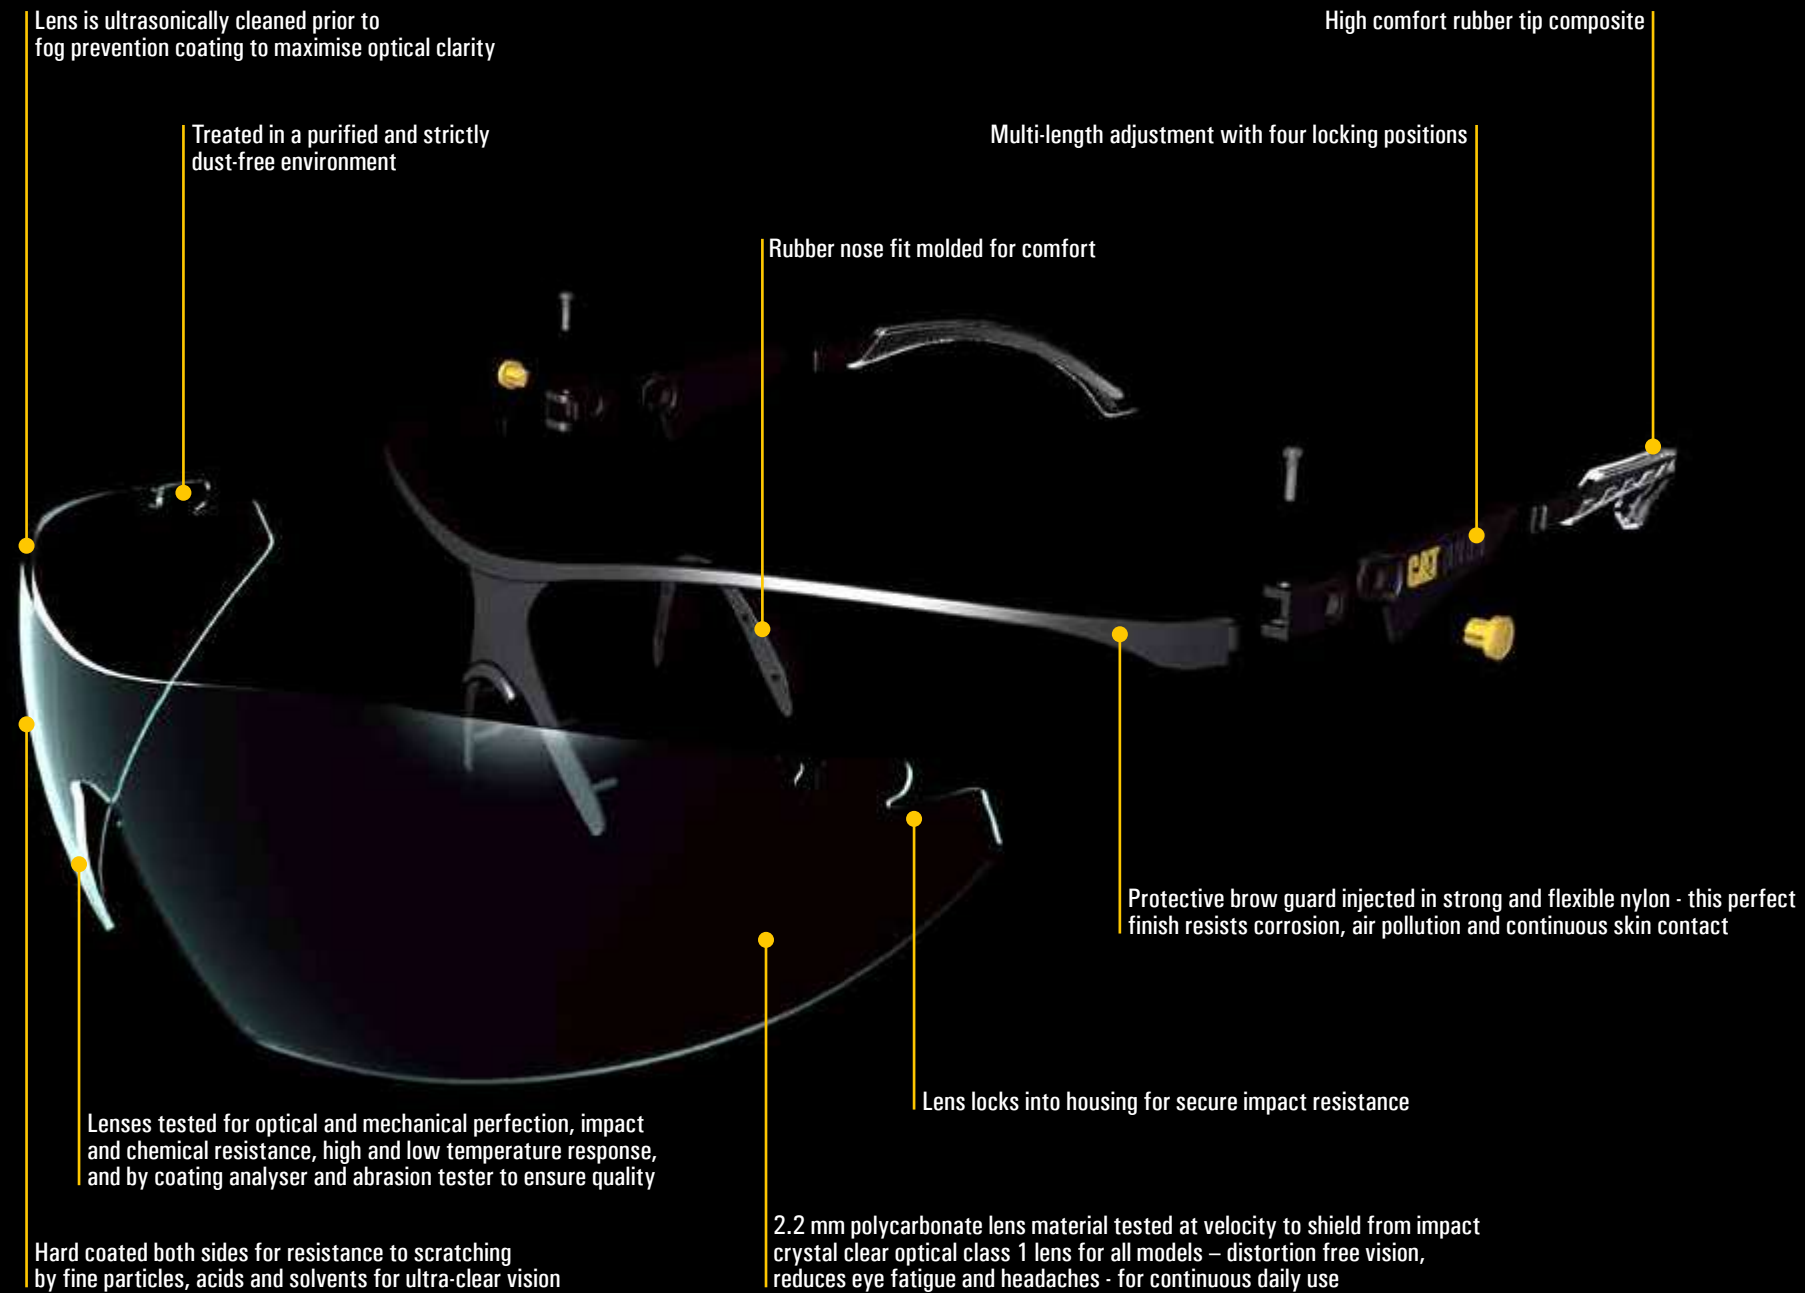

Discover Cat's protective Eyewear. The glasses are designed to eliminate distraction and irritation, keeping the wearer focused on the task and to have the ultimate eye protection at work.

The eye is a fragile organ. A small fleck of dust can cause conjunctivitis, a solid particle at high speed can cause a perforation of the eye, the detachment of the retina, or permanent loss of sight. Acute irritation of the eye and burns from chemicals and solvents can also cause partial to total loss of sight.

Many eye injuries occur when glasses are lifted to get a closer look. That's why clarity of vision through your protective eyewear is crucial. Cat safety eyewear eliminates the reasons why you'd remove the frame: Anti-fog coatings and ventilation systems, anti-scratch lenses and easy-clean finishes come as standard in Cat safety eyewear.

Ergonomically designed to flex-fit to your individual face shape, the temple lengths and angles can be individually adjusted, and snap-lock into position for security.

Cat frames provide optimum protection. Polycarbonate lenses provide the ultimate shield, locked in 3 directions to resist impact from the front and sides. In addition, frame materials are tested to ensure resistance to chemicals, and impact from particles. Engineered to the core for total comfort, optimised protection, and easy care, your clear vision ensures a reduced risk of injury. Cat protective eyewear meets the following international standards for quality and safety: CE EN 166:2001, ANSI Z87.1:2010, CSA Z94.3:2007, AS/NZS 1337:2010.

CSA-TREAD-100-AF

Cat Protective Eyewear - Clear

Weight:	29 g
Frame Material:	Nylon
Lens Material:	Polycarbonate
Nose Contact:	PVC with Rubber
Ear Contact:	PVC with Rubber
Anti Fog:	Yes
Anti Scratch:	Yes
Adjustable Temple:	No

Lens Specification:

- » Three lens inclination adjustments with snap-lock ratchet mechanism
- » 2,2 mm polycarbonate material tested at velocity to shield from impact
- » Crystal clear optical class 1 lens recommended for continuous wear
- » Fog prevention coating
- » Hard coated both sides for resistance to scratching

Frame Chassis:

- » Flex temples with integrated cushioning system
- » Neck cord attachment facility
- » Upper and lower eye protection, vented for air flow and fog resistance
- » Soft touch vented nose piece

CSA-TREAD-104-AF

Cat Protective Eyewear - Smokey

CSA-PLANER-100-AF

Cat Protective Eyewear - Clear

Weight:	32,3 g
Frame Material:	Nylon
Lens Material:	Polycarbonate
Nose Contact:	Nylon
Ear Contact:	Nylon with Rubber
Anti Fog:	Yes
Anti Scratch:	Yes
Adjustable Temple:	No

Lens Specification:

- » 2,2 mm polycarbonate material tested at velocity to shield from impact
- » Crystal clear optical class 1 lens recommended for continuous wear
- » Fog prevention coating
- » Hard coated both sides for resistance to scratching

Frame Chassis:

- » High wrap sports style
- » Flexible temples
- » Full front and side protection

CSA-PLANER-104-AF

Cat Protective Eyewear - Smokey

CSA-DOZER-100-AF

Cat Protective Eyewear - Clear

Weight:	24 g
Frame Material:	Nylon
Lens Material:	Polycarbonate
Nose Contact:	PVC with Rubber
Ear Contact:	Polycarbonate
Anti Fog:	Yes
Anti Scratch:	Yes
Adjustable Temple:	148 - 160 mm

Lens Specification:

- » Four lens inclination adjustments with snap-lock ratchet mechanism
- » Single wraparound 180 degree lens
- » 2,2 mm polycarbonate material tested at velocity to shield from impact
- » Crystal clear optical class 1 lens recommended for continuous wear
- » Fog prevention coating
- » Hard coated both sides for resistance to scratching

Frame Chassis:

- » Multi-length temple adjustment with 4 locking positions
- » High comfort PVC tip composite
- » Rubber nose fit soft-molded for comfort

CSA-DOZER-104-AF

Cat Protective Eyewear - Smokey

CSA-DIGGER-100-AF

Cat Protective Eyewear - Clear

Weight:	26 g
Frame Material:	Nylon
Lens Material:	Polycarbonate
Nose Contact:	PVC with Rubber
Ear Contact:	PVC with Rubber
Anti Fog:	Yes
Anti Scratch:	Yes
Adjustable Temple:	159 - 169 mm

Lens Specification:

- » Lens inclination adjustment with snap-lock ratchet mechanism
- » Single wraparound 180 degree lens
- » 2 mm polycarbonate material tested at velocity to shield from impact
- » Crystal clear optical class 1 lens recommended for continuous wear
- » Fog prevention coating
- » Hard coated both sides for resistance to scratching

Frame Chassis:

- » Protective brow guard injected in buff polished nylon
- » Multi-length temple adjustment with 4 locking positions
- » High comfort PVC tip composite
- » PVC nose fit molded for comfort

CSA-TRACK-100-AF

Cat Protective Eyewear - Clear

Weight: 25 g

Frame Material: Polycarbonate

Lens Material: Polycarbonate

Nose Contact: PVC with Rubber

Ear Contact: PC with Rubber

Anti Fog: Yes

Anti Scratch: Yes

Adjustable Temple: No

Lens Specification:

- » High wrap molded lens for upper and lower protection
- » 2,4 mm polycarbonate material tested at velocity to shield from impact
- » Crystal clear optical class 1 lens recommended for continuous wear
- » Fog prevention coating
- » Hard coated both sides for resistance to scratching

Frame Chassis:

- » Universal fit
- » Polycarbonate temples co-injected with soft tips
- » High comfort PVC tip composite
- » Color coded integrated nose fit
